About This Game

Soldiers: Arena is all about tactics. It is about teamwork and cooperation between armies. Those who are familiar with our games know that they are rather difficult to attribute to any particular genre. It's always a mix of strategy, tactics and action in the World War II entourage. This game is for those who feel the lack of action in RTS, and lack of immersion in tactical shooters. A unique series with more than ten years of history now receives a worthy multiplayer extension.

Features:

- **Direct control.** "Direct Control" gives you the opportunity to play almost any unit in your army with the third (or first) person view. At any moment during the game, you can switch to DC and control the unit with WASD, more accurately choosing the trajectory of the shell (grenade) and choose which part of the enemy tank you want to hit. And most importantly - it's easier to feel yourself in the epicenter of the battle.
- **Huge roster of units.** In total, about 200 units for the three game factions which have been created as per the real characteristics of World War II units.
- **Realism.** Creating commanders and setting up units, we focused on their tasks in real combat, their strengths and weaknesses. Tanks need the infantry support, infantrymen need artillery fire to suppress the location before advancing, and artillery strongly needs help securing their positions.
- **Diversity of gameplay.** A large set of tactical capabilities for units. Exploration and sabotage. Capture, repair and hijacking vehicles. Creating protective structures, digging trenches. Setting hedgehogs, minefields. Destruction and

neutralization of all of the above. Saving the wounded and destroying the guns. And much more.

- **Total destructibility.** During the battle, almost any object of the game space can be destroyed or burned. In addition, all objects, including shell-holes from explosions can be used as cover.
- **Modular realistic damage system.** Any vehicle, regardless of its type, consists of a set of components that can be broken or destroyed. When calculating the piercing chance and the damage to each component; the type of ammunition, the characteristics of the gun, the range of fire, the angle and thickness of armor plate and the threshold of its fatigue are taken into account. In addition, the chance of ammunition detonation, engine ignition, damage to wheels or tracks (which leads to immobilization of the unit) are calculated.
- **Coop game.** In addition to battles against other players, you can always compete with AI in cooperative gamemodes.
- **Advanced AI.** A good AI can create interesting game situations. In Soldiers: Arena, he can spawn paratroopers to the rear, smash artillery and infantry with tanks, use smoke screens, steal vehicles, and prepares many other surprises for the player.
